1. The first thing I noticed when I stepped  
 out of the car was the smell of the sea.  
 It was a fresh, salty breeze that seemed to  
 wash over me. I had heard that the  
 weather was perfect, and now I knew why.  
 The sun was shining brightly, and the  
 water was a deep, inviting blue. I  
 took a deep breath and felt a sense of  
 peace that I had never experienced before.  
 It was like a warm blanket on a hot day.  
 I had come to the right place at the right  
 time.

Carl Palmer's is the first impossible  
to find. It is a site of enormous rough  
granite. It is a low all sorts of peaks  
top one another. There is a large quantity  
of fine white sand, but the rock  
appears to be covered with a thick  
thin crust. It is a brown or black  
weathered surface. The little water  
falls to the sea & fresh water. There  
is a small stream of water here on the  
high trail. It is a fine sight to see  
the water.

6516 Populus. It is a small tree  
growing on the side of the trail.
